

# E110-D ECO

## MAINTENANCE SCHEDULE

### DAILY CHECKLIST

<p>1. Take the machine to a suitable area for the disposal of waste water and turn it off.</p>	<p>2. Activate the brake.</p>	<p>3. Unclip the drain hose.</p>	<p>4. Remove the hose cap and empty the recovery tank.</p>	<p>5. Empty and clean the debris collection basket.</p>	<p>6. Rinse out the recovery tank and clean the two floats.</p>
<p>7. Rinse out the vacuum hose.</p>	<p>8. Check that the vacuum motor filter is clean.</p>	<p>9. Rinse out the ECOsystem® filter.</p>	<p>10. Activate the ECOsystem® cleaning cycle.</p>	<p>11. Clean the squeegee and squeegee blades.</p>	<p>12. Clean the splash guard skirts.</p>
<p>13. Check the battery charge level and put the machine on charge if necessary.</p>	<p>14. Once charging is complete, check the level of electrolytes in the battery and if necessary, add distilled water (only for lead acid batteries).</p>	<p>15. Rinse the DoseMatic® detergent dosing system.</p>			

### WEEKLY CHECKLIST

<p>1. Clean the solution filter.</p>	<p>2. Clean the vacuum motor filter.</p>	<p>3. Check for wear on the squeegee blades, rotate or replace if necessary.</p>	<p>4. Inspect the brushes to make sure they are clean and in good condition. If the bristle length is close to the wear indicator (red color), replace the brush.</p>	<p>5. Check that the gasket in the tank lid is in good condition.</p>
		<p>If any of these parts are worn or damaged, replace them or contact technical assistance.</p>		
<p>6. Verify that the self-levelling splash guard is free to move, and that the blades are in good condition.</p>	<p>7. Inspect the drain hose and vacuum hose for damage, which can result in leaks.</p>
